# FRIDLE GROUP. QUANDO TENERCI SIGNIFICA DARE VITA ALLA PERFETTA SINERGIA TRA SOLIDITÀ E FLESSIBILITÀ.

FRIDLE GROUP:  
FOR OVER 40 YEARS  
SEALING SOLUTIONS,  
FLUID CONNECTORS AND  
HYDRAULIC COMPONENTS..

The group, since the beginning, has been synonymous with quality, proactive advice and constant technical support, in area of application.

And it was our natural propensity to adapt, combined with a flexible approach, that allowed us to find the necessary tools to embark on a path of continuous growth, making room for more and more customers and suppliers.

But also to new partners, such as Guarnifluid and HT-Hydraulic Technology, which are now to all intents and purposes an integral and constituent part of our group.

Where this room did not exist, however, we decided to create it; as in the case of the Fridle Academy, a real knowledge hub that we chose to dedicate to sharing our specialist know-how to the benefit of all our customers.

FRIDLE GROUP:  
DA OLTRE 40 ANNI  
SISTEMI DI TENUTA,  
FLUID CONNECTORS E  
COMPONENTI OLEODINAMICI.

Il gruppo è, da sempre, sinonimo di qualità, consulenza proattiva e assistenza tecnica costante in ogni settore di applicazione.

Ed è stata proprio la nostra naturale propensione all'adattamento, unita a un approccio flessibile, a permetterci di trovare gli strumenti necessari per intraprendere un percorso di crescita continua, facendo spazio a un numero sempre maggiore di clienti e fornitori.

Ma anche a nuovi partner, come Guarnifluid e HT-Hydraulic Technology, che sono parte integrante del nostro gruppo.

Laddove questo spazio non c'era, invece, abbiamo deciso di crearlo; come nel caso della Fridle Academy, un vero e proprio hub di conoscenze che abbiamo scelto di dedicare alla condivisione del nostro know-how specialistico a favore di tutti i nostri clienti.

FRIDLE GROUP.  
WHEN CARING  
MEANS GIVING LIFE  
TO THE PERFECT  
SYNERGY  
BETWEEN SOLIDITY  
AND FLEXIBILITY.

# NON PERDERE. QUINDI GARANTIRE.

Non si tratta solo di offrire una vasta gamma di referenze di prodotto a stock ma anche di garantire un'eccellente qualità nel servizio.

Il nostro staff fornisce quotidianamente consulenza, scouting di prodotto, flessibilità e velocità di reazione in Italia e sui mercati internazionali. Con le sedi di Vicenza, Brescia, Mantova, Modena e un sistema logistico ottimizzato, organizziamo e distribuiamo gli articoli in tempi rapidi.

Grazie alla nostra capacità di assistenza online e vendita e-commerce, supportata da processi logistici completamente automatizzati, arriviamo ovunque i nostri clienti abbiano bisogno del nostro intervento, consulenza o fornitura.

# NOT LOSING. THEREFORE GUARANTEEING.

It's not only about offering a full range of product references in stock, but also guaranteeing excellent service quality.

Our staff provides daily consulting, product scouting, flexibility and reaction speed in Italy and for international markets.

With facilities in Vicenza, Brescia, Mantova and Modena and an optimised logistics system, we organise and distribute items quickly.

Thanks to our online service and e-commerce capability, supported by fully automated logistical processes, we arrive wherever our customers need our intervention, advice or delivery.

## I NOSTRI SERVIZI OUR SERVICES

**CONSULENZA E ASSISTENZA TECNICA**  
CONSULTANCY AND TECHNICAL ASSISTANCE

**MILIONI DI PRODOTTI A MAGAZZINO**  
MILLIONS OF PRODUCTS IN STOCK

**LOGISTICA INTEGRATA E KANBAN**  
INTEGRATED LOGISTICS AND KANBAN

**CONTROLLO QUALITÀ IN ENTRATA E IN USCITA**  
INBOUND AND OUTBOUND QUALITY CONTROL

**PROGETTAZIONE E PRODUZIONE A DISEGNO DI GUARNIZIONI**  
DESIGN AND CUSTOMIZED SEALS PRODUCTION

**ETICHETTE PERSONALIZZATE E QR CODE**  
CUSTOMISED LABELS AND QR CODES

**ORDINI WEB**  
WEB ORDERS

**RILEVAZIONE CAMPIONI E KIT DEL CLIENTE**  
ARTICLE DETECTION AND KIT ASSEMBLY

**ASSEMBLAGGIO E COLLAUDO TUBI E RACCORDI**  
ASSEMBLY AND TESTING OF HOSES AND FITTINGS

**EVENTI FORMATIVI**  
TRAINING EVENTS

# SOLUZIONI DI TENUTA

## SEALING SOLUTIONS

### **TENUTE IDRAULICHE** HYDRAULIC SEALS

Profilo compatto per un'ottima tenuta alle alte e basse velocità, oltre che in condizioni statiche.

Compact profile for excellent sealing both at high and low speed and in static conditions.

### **ANELLI DI TENUTA PER ALBERI ROTANTI** ROTARY SHAFT SEALS

Labbro di tenuta con molla di trazione per trattenere il fluido lubrificante ed elemento parapolvere per isolare dalle impurità esterne.

Spring loaded sealing lip to contain the lubricating fluid and wiper to isolate from external impurities.

### **TENUTE PER ROTAZIONE AD ELEVATE PRESTAZIONI** HIGH PERFORMANCE ROTARY SEALS

Labbro di tenuta con molla di trazione per trattenere il fluido lubrificante ed elemento parapolvere per isolare dalle impurità esterne.

Spring loaded sealing lip to contain the lubricating fluid and wiper to isolate from external impurities.

## GUARNIZIONI IN PTFE PTFE SEALS

Vasta gamma di profili di tenuta realizzati in PTFE per garantire elevata resistenza alle basse/alte temperature e agli agenti chimici, bassa infiammabilità e ridotto coefficiente d'attrito.

Particolarmente adatto per applicazioni meccaniche, alimentari, elettriche e chimiche.

Wide range of sealing profiles built in PTFE to ensure high resistance to low/high temperatures and to chemical agents, low ignitability and reduced friction coefficient.

Very performing in mechanical, food, electrical and chemical applications.

## GUARNIZIONI STATICHE STATIC SEALS

Guarnizioni utilizzate in applicazioni ove è assente il movimento tra la tenuta e la relativa superficie di accoppiamento.

Used in applications where there is no shifting between the seal and the mating surface.

**O-RING**

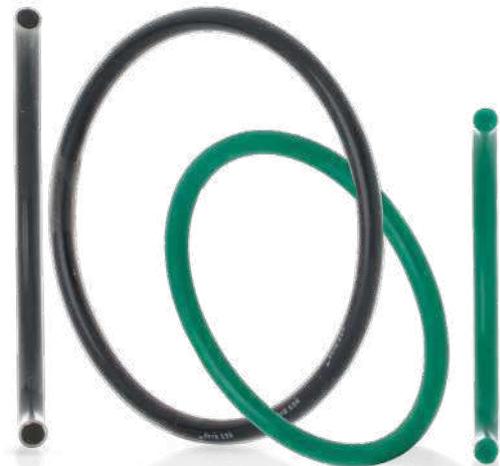

**FEP O-RING**

**X-RING**

**TRICLAMP**

**DUALSEALS**

**GUARNIZIONI METALLICHE  
CON MATERIALI CERTIFICATI**  
METAL SEALS AVAILABLE ALSO IN  
CERTIFIED MATERIALS

## ANELLI E NASTRI GUIDA WEAR RINGS AND WEAR STRIPS

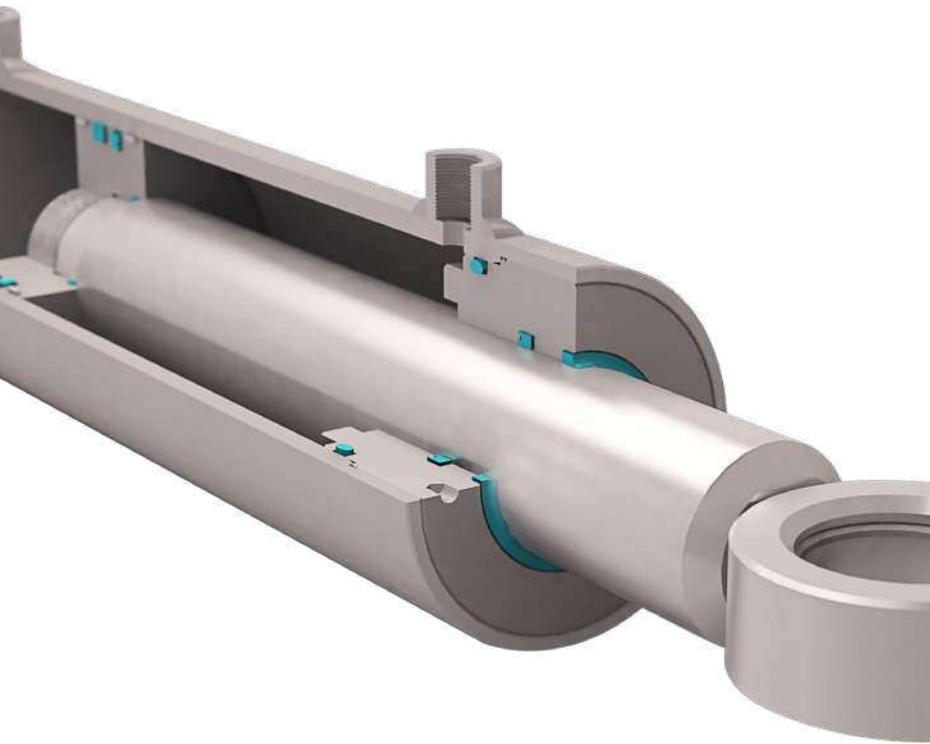

Elementi indispensabili nell'assorbire le sollecitazioni radiali e garantire l'affidabilità nelle applicazioni lineari.

Necessary components to absorb radial forces and to ensure durability in linear applications.

# APPLICAZIONI

## APPLICATIONS

### TENUTE PER CILINDRI OLEODINAMICI SEALS FOR HYDRAULIC CYLINDERS

Guarnizioni per applicazioni statiche e dinamiche in elastomero, TPU, PTFE, termoplastici tecnici (POM, PA, PE, PEEK), resine fenoliche e poliesteri. Soluzioni per cilindri speciali. Fornibili in kit.

Seals for static and dynamic applications in elastomers, TPU, PTFE, technical thermoplastics (POM, PA, PE, PEEK), phenolic resins and polyester. Solutions for special cylinders, also in kit.

### TENUTE PER I SETTORI FOOD & BEVERAGE SEALS FOR FOOD & BEVERAGE INDUSTRY

Tenute per applicazioni statiche e dinamiche con certificazione FDA, CE 1935/2004, 3A. Profili standard e a disegno in materiali quali: EPDM, FKM, MVQ, FFKM, PUR, PTFE. Guarnizioni incapsulate per ottenere la massima resa nelle operazioni di sanificazione. Guarnizioni detectabili con certificazione alimentare.

Seals for static and dynamic applications with FDA, CE 1935/2004, 3A certification. Standard and custom profiles in materials such as EPDM, FKM, MVQ, FFKM, PUR, PTFE. Encapsulated gaskets to obtain the maximum performance in sanitizing operations. Detectable gaskets with food certification.

## TENUTE PER IL SETTORE FARMACEUTICO & BIOMEDICALE

### SEALS FOR PHARMACEUTICAL & BIOMEDICAL INDUSTRY

Tenute per applicazioni statiche e dinamiche con certificazioni: USP VI nei materiali EPDM, FKM, FFKM, MVQ e PTFE. Profili standard e a disegno.

Seals for static and dynamic applications with certifications: USP VI in EPDM, FKM, FFKM, MVQ and PTFE materials. Standard and custom profiles.

## TENUTE PER I SETTORI CHIMICO, OIL & GAS

### SEALS FOR CHEMICAL AND OIL & GAS INDUSTRIES

Guarnizioni per impiego statico e dinamico. Materiali adatti a basse e alte temperature, altissime pressioni e ad elevata resistenza chimica, che prevengono la decompressione esplosiva secondo gli standard Norsok M710, Total GS PVV 142, Nace TM 0297, MCC RED-01.

Seals for static and dynamic use. Materials suitable for low and high temperatures, extremely high pressures and high chemical resistance that prevent explosive decompression according to Norsok M710, Total GS PVV 142, Nace TM 0297, MCC RED-01 standards.

## TENUTE PER IL SETTORE DELLA MECCANICA PESANTE

### SEALS FOR HEAVY ENGINEERING AND IRON & STEEL INDUSTRIES

Guarnizioni per applicazioni statiche e dinamiche in elastomero, PUR, PTFE, termoplastici tecnici (POM, PA, PE, PEEK), resine fenoliche e poliesteri.

Seals for static and dynamic applications in elastomer, PUR, PTFE, technical thermoplastics (POM, PA, PE, PEEK), phenolic resins and polyester.

## OUR PARTNERS

Fridle Group has established with many of the industry leading manufacturers, national and international, strategic distribution partnerships, some of them exclusive for Italy.

Thanks to the strong negotiating power and the ongoing direct communication channel with the manufacturers, Fridle Group can easily confront with the technical and engineering teams and benefit from a dedicated logistic and support service.

Our company can also count on specific tests to certify the quality of both the materials and the components.

With the aim of constantly improving the portfolio of products and services offered to its customers, Fridle Group focuses its efforts in scouting, internationally, the leading manufacturers and the most innovative solutions.

# I NOSTRI ALLEATI.

Fridle Group ha instaurato con molti dei più grandi e qualificati produttori del settore, nazionali e internazionali, un rapporto di distribuzione, in alcuni casi in esclusiva per l'Italia.

Grazie al forte potere contrattuale e alla relazione di dialogo con le case costruttrici, Fridle Group può vantare un confronto quotidiano con i team di progettazione e un servizio di assistenza e logistica preferenziali.

L'azienda può inoltre contare su test mirati alla certificazione e alla qualità sia dei materiali sia dei componenti.

Al fine di un miglioramento continuo dell'offerta commerciale e del servizio, Fridle Group si dedica costantemente a una attività di scouting internazionale, alla ricerca dei migliori partner e dei prodotti più innovativi.

## SISTEMI DI TENUTA

DISTRIBUTORE ESCLUSIVO PER L'ITALIA

**FRIDLE**  
**FRIDLE GROUP**

# SKF SEALS DISTRIBUTOR

Out of the Fridle experience we have established a new company division that is specialised in consulting, design and production of custom turned gaskets. Thanks to the SKF technology we can guarantee the highest performance sealing solution for any sector of application. We are able to machine elastomeric and thermoplastic materials with an outside diameter of up to 600 mm, guaranteeing a high quality and efficient service by offering each customer endless design and sealing solutions.

Dall'esperienza di Fridle è nata una nuova divisione aziendale specializzata nella consulenza, progettazione e produzione di guarnizioni tornite su misura. Grazie alla tecnologia SKF possiamo garantire la soluzione di tenuta più performante in qualsiasi settore di applicazione. Possiamo lavorare materiali elastomerici e termoplastici fino a un diametro esterno di 600 mm, garantendo un servizio di grande qualità ed efficienza offrendo a ogni cliente infinite soluzioni di design e di tenuta.

# GUARNIZIONI TORNITE

Lo sviluppo di nuove applicazioni di tenuta rende fondamentale la scelta di materiali sempre più performanti. Le soluzioni di tenuta devono affrontare velocità, pressioni e temperature sempre maggiori immerse in fluidi scarsamente lubrificanti.

La compatibilità chimica dei materiali risulta una variabile importante da considerare, soprattutto con fluidi HFA, HFB o i moderni oli biodegradabili.

In un contesto in continua evoluzione, Fridle Group propone una gamma di oltre 15 materiali suddivisi tra: elastomeri, poliuretani e termoplastici in grado di soddisfare le applicazioni più critiche.

Le macchine utensili di concezione SKF, utilizzate da Fridle Group, permettono di lavorare materiali elastomerici e termoplastici fino a un diametro esterno di 600 mm.

I profili delle guarnizioni prodotte da lavorazione meccanica possono essere sia standard sia speciali.

## MACHINED SEALS

Selecting the most performing materials is critical in the development of new sealing solutions.

Seals must face very demanding conditions of speed, pressure and temperature and frequently in contact with poor lubricating materials.

The materials chemical compatibility is very important, especially with HFA, HFB fluids and with biodegradable oils.

In an ever-evolving context, Fridle Group offers a range of 15 materials, divided between elastomers, polyurethans and thermoplastic, capable to meet the requirements of the most critical applications.

The SKF machines operated by Fridle Group, can lathe elastomeric and thermoplastic materials with an outer diameter up to 600 mm. The machined sealing profiles can be standard or customized.

Elastomers are extremely flexible materials and can easily adjust to any surface.

Thanks to their structure, they have a high elasticity and resilience and usually offer a good compression set.

Thermoplastic elastomers, better known as polyurethanes, demonstrate the same properties of elastomers but they are harder and more wear resistant.

Thermoplastic materials are essentially harder and more rigid, they possess higher mechanical characteristics.

Our expertise allows us to guide the customer in choosing the correct sealing solutions to meet all requirements, produced with the design and the material that best suit the application, constantly contributing to the improvement of the finished product.

## I MATERIALI SKF SKF MATERIALS

I materiali elastomerici, estremamente flessibili, si adattano a qualsiasi superficie con il minimo sforzo.

Grazie alla loro struttura hanno elevata elasticità e spesso offrono un ridotto compression set.

Gli elastomeri termoplastici, più comunemente conosciuti come poliuretani, vantano le caratteristiche degli elastomeri ma con elevata durezza e resistenza all'usura.

I materiali termoplastici sono più duri e rigidi, vantano elevate caratteristiche meccaniche.

La nostra esperienza di oltre 40 anni ci permette di guidare il cliente nella scelta della soluzione di tenuta su misura per le proprie necessità, realizzata con il profilo ed il materiale che meglio si adattano all'applicazione, contribuendo al miglioramento continuo delle performance del prodotto finito.

## SKF ECOPUR

Poliuretano (TPU) con ottima resistenza all'abrasione e basso compression set. Può essere utilizzato con olio minerale in applicazioni fino a 400 bar.

### **PROPRIETÀ SPECIFICA: RESISTENZA ALL'USURAPROPRIETÀ ALL'USURA.**

Thermoplastic polyurethane with an excellent resistance to abrasion and low compression set. It can be used in mineral oil and in applications up to 400 bar.

### **MAIN FEATURE: WEAR RESISTANCE.**

## SKF S-ECOPUR

Poliuretano (TPU) autolubrificante che permette di ridurre attrito ed usura. Può essere utilizzato in applicazioni con acqua o pneumatiche.

### **PROPRIETÀ SPECIFICA: AUTOLUBRIFICAZIONE.**

Self-lubricated thermoplastic polyurethane optimized to reduce friction and improve wear resistance. It is suitable for most critical applications in water hydraulics and in non-lubricated pneumatics.

### **MAIN FEATURE: SELF-LUBRICATION.**

## SKF H-ECOPUR

Poliuretano (TPU) resistente all'idrolisi, ottime prestazioni meccaniche e resistenza all'abrasione. Utilizzabile in acqua fino a 90°C. È particolarmente adatto ad applicazioni in ambito alimentare e marino.

### **PROPRIETÀ SPECIFICA: RESISTENZA ALL'IDROLISI.**

Hydrolysis resistant thermoplastic polyurethane, with great mechanical properties. It can be used in water up to 90°C; it is recommended for use in food and marine applications.

### **MAIN FEATURE: HYDROLYSIS RESISTANCE.**

## SKF T-ECOPUR

Poliuretano (TPU) per applicazioni a basse temperature, garantisce le medesime proprietà dell'Ecopur in applicazioni fino a -50°C.

### **PROPRIETÀ SPECIFICA: RESISTENZA ALLE BASSE TEMPERATURE.**

Thermoplastic polyurethane for low temperature applications. It guarantees the same properties of Ecopur in applications up to -50°C.

### **MAIN FEATURE: WEAR RESISTANCE.**

## SKF ECOPUR

Poliuretano (TPU) con ottima resistenza all'abrasione e basso compression set. Può essere utilizzato con olio minerale in applicazioni fino a 400 bar.

### **PROPRIETÀ SPECIFICA: RESISTENZA ALL'USURAPROPRIETÀ ALL'USURA.**

Thermoplastic polyurethane with an excellent resistance to abrasion and low compression set. It can be used in mineral oil and in applications up to 400 bar.

### **MAIN FEATURE: LOW TEMPERATURES RESISTANCE.**

## SKF ECORUBBER-1

Materiale elastomerico NBR con buona resistenza agli oli minerali, fluidi HFA, HFB e HFC.

### **PROPRIETÀ SPECIFICA: VERSATILITÀ D'IMPIEGO.**

NBR based elastomer with good resistance to mineral oils and HFA, HFB and HFC pressure fluids.

### **MAIN FEATURE: VERSATILITY.**

## SKF ECORUBBER-2

Materiale elastomerico FKM con ottima resistenza al calore, all'invecchiamento e agli agenti chimici.

**PROPRIETÀ SPECIFICA: COMPATIBILITÀ CHIMICA.**

FKM based elastomeric material with great resistance to heat, aging and chemical agents.

**MAIN FEATURE: CHEMICAL COMPATIBILITY.**

## F10-50

Materiale termoplastico PTFE + Bronzo con elevate prestazioni di resistenza alla compressione, scorrevolezza e conduttività termica.

**PROPRIETÀ SPECIFICA: VERSATILITÀ NEGLI IMPIEGHI.**

Elastomeric material, PTFE loaded with bronze. This material offers outstanding of compression resistance, gliding and thermal conductivity.

**MAIN FEATURE: VERSATILITY.**

## F10-148

Materiale termoplastico PTFE + fibre minerali e lubrificanti con elevata resistenza meccanica rigidità e durezza.

**PROPRIETÀ SPECIFICA: RESISTENZA MECCANICA.**

Thermoplastic PTFE loaded with mineral fibers and lubricants with high mechanical resistance, rigidity and hardness.

**MAIN FEATURE: MECHANICAL RESISTANCE.**

## F10-28

Materiale termoplastico PTFE + fibre polimeriche con eccellenti prestazioni meccaniche e di resistenza all'usura, consigliato anche per applicazioni alimentari.

**PROPRIETÀ SPECIFICA: RESISTENZA ALL'USURAPROPRIETÀ ALL'USURA.**

Thermoplastic material, PTFE loaded with polymeric fibers. It offers outstanding mechanical performances and excellent wear resistance.

Recommended for food applications.

**MAIN FEATURE: WEAR RESISTANCE.**

## SKF ECOPAЕК

Polimero PEEK ad elevata durezza e resistenza alla trazione, mantiene le proprie caratteristiche meccaniche anche ad elevate temperature.

**PROPRIETÀ SPECIFICA: DUREZZA.**

PEEK polymer with high tensile strength and stiffness. It maintains its mechanical properties also at high temperatures

**MAIN FEATURE: HARDNESS.**

## SKF X-ECOPUR H

Poliuretano (TPU) ad elevata durezza che garantisce le performance meccaniche di SKF X-Ecopur in applicazioni con fluidi a base acquosa, grazie alle proprietà di resistenza all'idrolisi.

**PROPRIETÀ SPECIFICA: RESISTENZA ALL'IDROLISI E DUREZZA.**

Extremely hard polyurethane which guarantees the mechanical performances of SKF X-Ecopur in water-based fluids thanks to its outstanding hydrolysis resistance

**MAIN FEATURE: HYDROLYSIS RESISTANCE AND HARDNESS.**

## SKF X-ECOPUR

Poliuretano (TPU) ad elevata durezza, combina ottime proprietà di riduzione dell'attrito e resistenza all'usura alla resistenza ad elevate pressioni. Questo materiale può essere utilizzato in applicazioni con elevati gap radiali migliorando le prestazioni di un TPU standard o di un materiale termoplastico.

**PROPRIETÀ SPECIFICA: RESISTENZA ALL'USURA E DUREZZA.**

Hard grade thermoplastic polyurethane, it provides outstanding friction reduction and wear resistance as well as pressure resistance.

This material is suitable for applications with larger clearances, improving the performances of standard TPUs and thermoplastic materials.

**MAIN FEATURE: WEAR RESISTANCE.**

## SKF X-ECOPUR S

Poliuretano (TPU) ad elevata durezza che unisce alle caratteristiche di resistenza all'estrusione degli agenti lubrificanti che riducono sensibilmente l'attrito ed ottimizzano le prestazioni in applicazioni a secco.

**PROPRIETÀ SPECIFICA: AUTOLUBRIFICAZIONE E DUREZZA.**

Extremely hard polyurethane which combines a better extrusion resistance to lubricating agents reducing considerably friction and optimizing the performances under poor lubricated conditions.

**MAIN FEATURE: SELF-LUBRICATION AND HARDNESS.**

# SOLUZIONI APPLICATIVE APPLICATIONS

## TENUTE IDRAULICHE A LABBRO HYDRAULIC LIP SEALS

Modalità produttiva: tornitura e stampaggio.  
Impiego: applicazioni alternative idrauliche e pneumatiche.

Campo di applicazione: cilindri idraulici standard, presse, attuatori pneumatici.

Production method: machining and molding.  
Use: hydraulic and pneumatic alternative applications.

Applications: standard hydraulic cylinders, presses, pneumatic actuators.

## TENUTE IDRAULICHE IN PTFE PTFE HYDRAULIC SEALS

Modalità produttiva: tornitura e stampaggio.  
Impiego: applicazioni alternative idrauliche.  
Campo di applicazione : cilindri idraulici, presse, macchine movimento terra, attrezzature idrauliche.

Production method: machining and molding.  
Use: hydraulic alternative applications.  
Applications: hydraulic cylinders, presses, earth moving machines, hydraulic equipment.

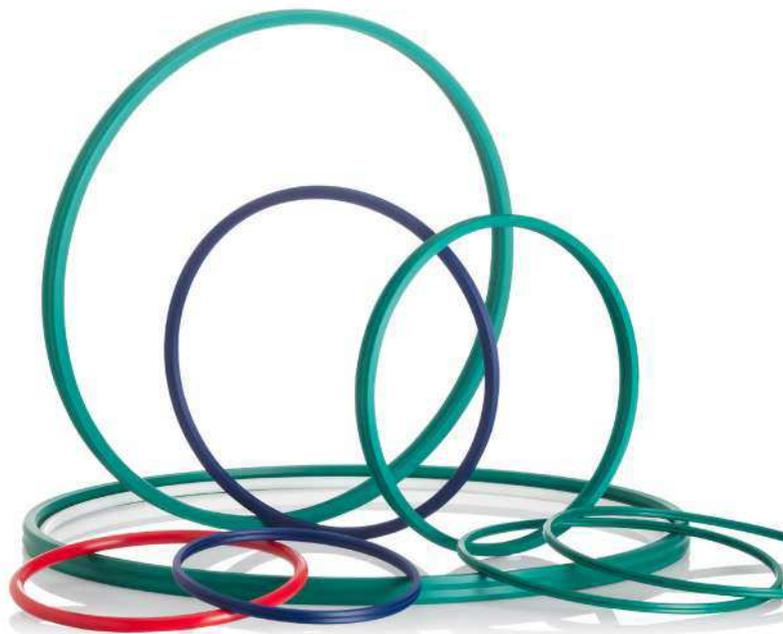

## TENUTE STATICHE STATIC SEALS

Modalità produttiva: tornitura e stampaggio.  
Impiego: applicazioni idrauliche e pneumatiche.

Campo di applicazione: presse, macchine agricole, macchine movimento terra, valvole, flange e macchine utensili.

Production method: machining and molding.  
Use : hydraulic and pneumatic applications.  
Applications: presses, agricultural machines, earth moving machines, valves, flanges, machine tools.

## ANELLI DI TENUTA PER ALBERI ROTANTI ROTARY SHAFT SEALS

Modalità produttiva: stampaggio.  
Impiego: applicazioni rotative.  
Campo di applicazione: elementi rotanti, motori elettrici, riduttori, elettropompe.

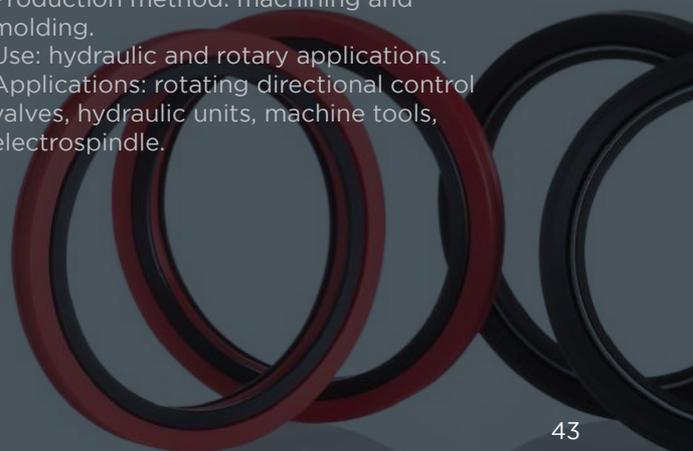

Production method: molding.  
Use: rotary applications.  
Applications: rotating elements, electric motors, gearboxes, electric pumps.

## TENUTE ROTATIVE IN PTFE PTFE ROTARY SEALS

Modalità produttiva: tornitura e stampaggio.  
Impiego: applicazioni idrauliche e rotanti.  
Campo di applicazione : distributori rotanti, unità idrauliche, macchine utensili, elettromandri.

Production method: machining and molding.  
Use: hydraulic and rotary applications.  
Applications: rotating directional control valves, hydraulic units, machine tools, electrospindle.
